

Pager+ Use Cases.

Ward nurse to Pharmacist

Ward nurse is prepping a patient for discharge and would like to know what time the patient's Tablets to takeaway (TTAs) will be ready.

The nurse can message the ward pharmacist on Pager+ and ask what time they will be brought up.

The ward pharmacist will see the INBOUND message and be able to response directly via Pando.

SHO to specialist registrar

Following the daily ward round the SHO needs to contact the Cardiology team and ask for a review

The SHO finds the cardiology registrar on the Pando Pager+ directory and asks if they are free to review the patient on the ward, the SHO also sends a brief history of the patient.

The cardiology registrar replies to the message and is able to share when they will be available to see the patient; they also ask for a further investigation to be done.

Charge Nurse to theatre coordinator

The charge nurse has started their shift and would like to know how many post op patients to expect during the day.

The charge nurse finds the theatre coordinator pager in the Pando Pager+ directory and sends them a message.

The theatre coordinator is able to response with the number of patients and also can update the charge nurse throughout the day when the post op patients are due to the transferred.
